

Kyrgyz Republic

Human Capital Index 2020

This brief provides an update to the Human Capital Index (HCI). First launched in 2018, the HCI measures the amount of human capital that a child born today can expect to attain by age 18. It conveys the productivity of the next generation of workers compared to a benchmark of complete education and full health. Worldwide a child born in 2020 can expect, on average, to be 56 percent as productive as she could be when she grows up. All data represent the status of countries pre-COVID-19.

THE HUMAN CAPITAL INDEX

Human Capital Index. A child born in the Kyrgyz Republic today will be **60 percent** as productive when she grows up as she could be if she enjoyed complete education and full health. This is lower than the average for Europe & Central Asia region but higher than the average for Lower middle income countries.

- **Probability of Survival to Age 5.** 98 out of 100 children born in the Kyrgyz Republic survive to age 5.
- **Expected Years of School.** In the Kyrgyz Republic, a child who starts school at age 4 can expect to complete **12.9 years** of school by her 18th birthday.
- **Harmonized Test Scores.** Students in the Kyrgyz Republic score **420** on a scale where 625 represents advanced attainment and 300 represents minimum attainment.
- **Learning-adjusted Years of School.** Factoring in what children actually learn, expected years of school is only **8.7 years**.
- **Adult Survival Rate.** Across the Kyrgyz Republic, **85 percent** of 15-year olds will survive until age 60. This statistic is a proxy for the range of health risks that a child born today would experience as an adult under current conditions.
- **Healthy Growth (Not Stunted Rate).** **88** out of 100 children are **not** stunted. **12** out of 100 children are stunted, and so are at risk of cognitive and physical limitations that can last a lifetime.

DIFFERENCES IN HCI ACROSS GENDER AND SOCIO-ECONOMIC GROUPS

In the Kyrgyz Republic, the HCI for girls is higher than for boys. Table 1 shows gender disaggregation for each of the HCI components.

The ratio in HCI between the richest and poorest 20 percent of the population in the Kyrgyz Republic is **1.20** (global average: 1.35; global range: 1.12-1.68).

Table 1. HCI by Gender and Socio-economic Group

Component	Boys	Girls	Overall
HCI	0.58	0.62	0.60
Survival to Age 5	0.98	0.98	0.98
Expected Years of School	12.9	12.9	12.9
Harmonized Test Scores	414	426	420
Learning-adjusted Years of School	8.5	8.8	8.7
Adult Survival Rate	0.79	0.91	0.85
Not Stunted Rate	0.87	0.89	0.88
HCI Ratio (richest / poorest 20 percent)			1.20

Figure 1. HCI and Components

Note:

- Large circle represents Kyrgyz Republic
- Small circles represent other countries
- Lines and color of circles indicate quartiles of the distribution

The outlook for the next generation has been improving in most countries in Europe & Central Asia. Efforts are being made to protect human capital gains against setbacks and accelerate progress for all. The challenges unleashed by COVID-19 require an even stronger policy response, including greater use of technology to improve service delivery and enhanced social assistance programs, to ensure that people receive quality education and health care.

DOMESTIC RESOURCE UTILIZATION AND MOBILIZATION

- **Health Spending.** The Kyrgyz Republic spends **2.6 percent** (2017) of its GDP in public spending on health. This is lower than both the regional average (4.9%) and the average for its income group (2.8%). **3 percent** (2016) of the population incurs catastrophic health expenditure measured as out-of-pocket spending exceeding 10% of household consumption or income.
- **Education Spending.** The Kyrgyz Republic spends **6.0 percent** (2017) of its GDP in government education spending. This is higher than both the regional average (4.6%) and the average for its income group (4.5%).
- **Social Assistance Spending.** The Kyrgyz Republic spends **2.6 percent** (2018) of its GDP on social assistance. This is higher than both the regional average (1.8%) and the average for its income group (1.4%).
- **Government Revenue.** General government revenue in the Kyrgyz Republic is **32.8 percent** (2018) of GDP. This is lower than the average for its region (38.1%) but higher than the average for its income group (27.3%).

COMPLEMENTARY INDICATORS

- **Learning Poverty.** In the Kyrgyz Republic, **64 percent** (2014) of 10-year-olds cannot read and understand a simple text by the end of primary school. This is higher than both the average for its region (11%) and the average for its income group (59%).
- **Pre-primary Gross Enrollment.** In the Kyrgyz Republic, the gross enrollment ratio in pre-primary education is **40 percent** (2018). This is lower than both the average for its region (85%) and the average for its income group (49%).
- **Quality-adjusted Years of Higher Education.** In the Kyrgyz Republic, about **29 percent** (2017) of adults ages 30-34 have a tertiary degree. A child born today can expect to complete **1 year** of higher education. Factoring in the quality of higher education, expected years of higher education is only **0.8 years**.
- **NCD Deaths.** In the Kyrgyz Republic, the probability of dying between ages 30 and 70 from cardiovascular disease, cancer, diabetes, or chronic respiratory diseases is **25 percent** (2016). This is higher than both the average for its region (17%) and the average for its income group (21%).
- **Health Risk Factors.** In the Kyrgyz Republic **15 percent** of adults are obese, **26 percent** are smokers, and **11 percent** are heavy drinkers.
- **Hypertension.** In the Kyrgyz Republic, **23 percent** (2015) of the population age 18 and older has hypertension. This is lower than the average for its region (29%) but higher than the average for its income group (22%).
- **Diabetes.** In the Kyrgyz Republic, **6 percent** (2019) of the population ages 20-79 has type 1 or type 2 diabetes. This is similar to the average for its region (6%) but lower than the average for its income group (8%).
- **Universal Health Coverage (UHC) Index.** The index, ranging from 0 to 100, measures coverage of essential health services based on tracer interventions. In the Kyrgyz Republic, the UHC Index score is **70** (2017). This is lower than the average for its region (75) but higher than the average for its income group (56).
- **Social Safety Net Coverage.** In the Kyrgyz Republic, **13 percent** (2013) of the poorest quintile is covered by social safety nets. This is lower than both the average for its region (46%) and the average for its income group (39%).

- **Human Capital Utilization.** In the Kyrgyz Republic, **60 percent** (2018) of the working-age population is employed. This is lower than the average for its region (65%) but higher than the average for its income group (54%).
