

St. Vincent and the Grenadines

Human Capital Index 2020

This brief provides an update to the Human Capital Index (HCI). First launched in 2018, the HCI measures the amount of human capital that a child born today can expect to attain by age 18. It conveys the productivity of the next generation of workers compared to a benchmark of complete education and full health. Worldwide a child born in 2020 can expect, on average, to be 56 percent as productive as she could be when she grows up. All data represent the status of countries pre-COVID-19.

THE HUMAN CAPITAL INDEX

Human Capital Index. A child born in St. Vincent and the Grenadines today will be **53 percent** as productive when she grows up as she could be if she enjoyed complete education and full health. This is lower than the average for Latin America & Caribbean region and Upper middle income countries.

- **Probability of Survival to Age 5.** 98 out of 100 children born in St. Vincent and the Grenadines survive to age 5.
- **Expected Years of School.** In St. Vincent and the Grenadines, a child who starts school at age 4 can expect to complete **12.3 years** of school by her 18th birthday.
- **Harmonized Test Scores.** Students in St. Vincent and the Grenadines score **391** on a scale where 625 represents advanced attainment and 300 represents minimum attainment.
- **Learning-adjusted Years of School.** Factoring in what children actually learn, expected years of school is only **7.7 years**.
- **Adult Survival Rate.** Across St. Vincent and the Grenadines, **83 percent** of 15-year olds will survive until age 60. This statistic is a proxy for the range of health risks that a child born today would experience as an adult under current conditions.
- **Healthy Growth (Not Stunted Rate).** Data on stunting are not available for St. Vincent and the Grenadines.

DIFFERENCES IN HCI ACROSS GENDER AND SOCIO-ECONOMIC GROUPS

In St. Vincent and the Grenadines, the HCI for girls is higher than for boys. Table 1 shows gender disaggregation for each of the HCI components.

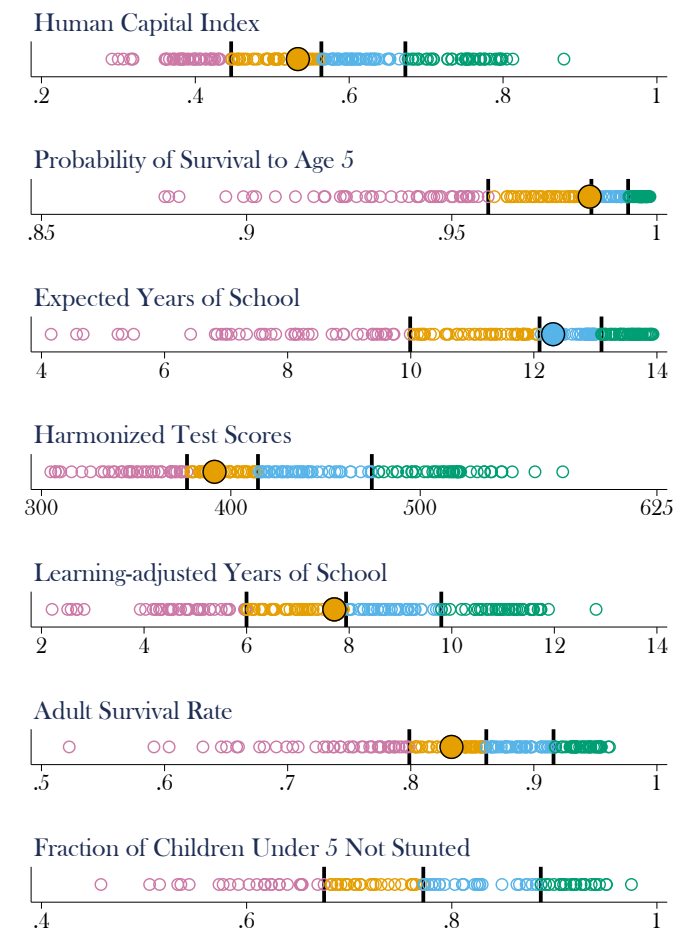

In St. Vincent and the Grenadines, there are not sufficient data to disaggregate HCI by socio-economic groups.

Table 1. HCI by Gender and Socio-economic Group

Component	Boys	Girls	Overall
HCI	0.50	0.57	0.53
Survival to Age 5	0.98	0.99	0.98
Expected Years of School	11.8	12.9	12.3
Harmonized Test Scores	386	397	391
Learning-adjusted Years of School	7.3	8.2	7.7
Adult Survival Rate	0.79	0.88	0.83
Not Stunted Rate	-	-	-
HCI Ratio (richest / poorest 20 percent)	-

Figure 1. HCI and Components

Note:

- Large circle represents St. Vincent and the Grenadines
- Small circles represent other countries
- Lines and color of circles indicate quartiles of the distribution

Countries in Latin America and the Caribbean have improved their human capital outcomes, but large socioeconomic, gender and geographic inequalities still hinder inclusive development. To ensure continued progress and overcome the challenges unleashed by COVID-19, countries need to build strong and resilient public health systems, move toward universal social protection, boost learning achievement especially in early childhood, and improve employability, productivity and working conditions.

DOMESTIC RESOURCE UTILIZATION AND MOBILIZATION

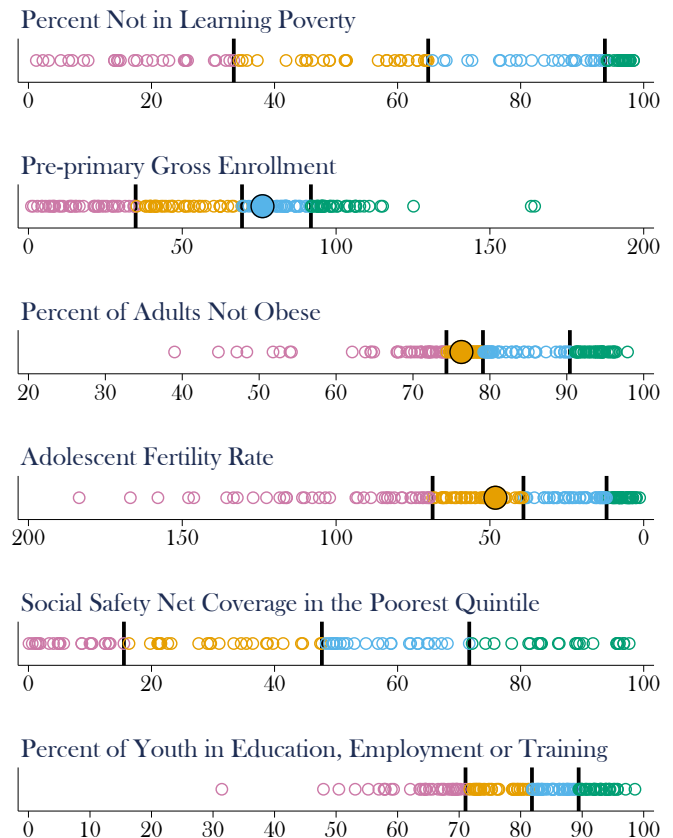

- **Health Spending.** St. Vincent and the Grenadines spends **2.9 percent** (2017) of its GDP in public spending on health. This is lower than both the regional average (3.8%) and the average for its income group (4%).
- **Education Spending.** St. Vincent and the Grenadines spends **5.7 percent** (2018) of its GDP in government education spending. This is higher than both the regional average (4.8%) and the average for its income group (4.7%).
- **Social Assistance Spending.** St. Vincent and the Grenadines spends **1.7 percent** (2015) of its GDP on social assistance. This is higher than both the regional average (1.4%) and the average for its income group (1.5%).
- **Government Revenue.** General government revenue in St. Vincent and the Grenadines is **28.2 percent** (2018) of GDP. This is higher than the average for its region (24.7%) but lower than the average for its income group (30.6%).

COMPLEMENTARY INDICATORS

- **Learning Poverty.** In St. Vincent and the Grenadines, data on learning poverty are not available. In its region, 55 percent of 10-year-olds cannot read and understand a simple text by the end of primary school. The corresponding value for its income group is 38 percent.
- **Pre-primary Gross Enrollment.** In St. Vincent and the Grenadines, the gross enrollment ratio in pre-primary education is **76 percent** (2018). This is similar to the average for its region (76%) but higher than the average for its income group (63%).
- **NCD Deaths.** In St. Vincent and the Grenadines, the probability of dying between ages 30 and 70 from cardiovascular disease, cancer, diabetes, or chronic respiratory diseases is **23 percent** (2016). This is higher than both the average for its region (18%) and the average for its income group (20%).
- **Obesity.** In St. Vincent and the Grenadines, **24 percent** (2016) of adults age 18 and older are obese. This is similar to both the average for its region (24%) and its income group (24%).
- **Adolescent Fertility Rate.** In St. Vincent and the Grenadines, there are **48 births** (2018) per 1,000 women ages 15-19. This is lower than the average for its region (56) but higher than the average for its income group (45).
- **Social Safety Net Coverage.** In St. Vincent and the Grenadines, data on social safety net coverage of the poorest quintile are not available. The average for its region is 68 percent and for its income group is 57 percent.
- **Share of Youth Not in Education, Employment or Training (NEET).** In St. Vincent and the Grenadines, data on share of youth not in education, employment or training are not available. The average for its region is 21 percent and for its income group is 24 percent.
- **Drinking Water.** In St. Vincent and the Grenadines, **95 percent** (2017) of the population has at least a basic source of drinking water. This is similar to both the average for its region (95%) and its income group (95%).

- **Internet Connectivity.** In St. Vincent and the Grenadines, **21 percent** (2016) of the population uses the internet. This is lower than both the average for its region (62%) and the average for its income group (60%).
